## *Custom Compound Joinery Timber Frame, Connestee Falls, near Brevard, NC*

This custom timber frame was designed by Cabin Creek Timber Frames designer to meet the exacting specifications of the home owners. They wanted to take advantage of the sun by using passive solar techniques in their frame among other 'green building' techniques. Even though the joinery you see here is upside down from its position in the timber frame— one can see the tightness and exacting cuts to the timber frame components.

*Please contact Tracy at Cabin Creek 877-369-5899 or [tbailey@cabincreektimberframes.com](mailto:tbailey@cabincreektimberframes.com) for raising details.*

- Custom compound joinery timber frame, near Brevard, NC Pg.1
- SC Judge has his roof raised — then custom timber frame was placed Pg. 2
- CCTF donated timber frame sign to Upper Cartoogechaye Community Pg .2

Here you can see the 'top knot' of their timber framer albeit upside down at fit up.

Winter 2007

South Carolina Judge had his roof raised —

then had Cabin Creek drop a brand new timber frame in its place !!!

Lake Keowee, South Carolina

We're on the web at [www.cabincreektimberframes.com](http://www.cabincreektimberframes.com)  
Let us hear from you—[info@cabincreektimberframes.com](mailto:info@cabincreektimberframes.com)

Cabin Creek Timber Frames donates

————— new timber frame sign —————

This new timber frame sign will be erected at the North-West end of Jones Creek Road. It will replace the locust pole sign that has been/was there for decades.

The old sign had the names of the home owners in the area. Due to the high number of people moving into the area—the new sign will probably have a map of all the local roads in and around the area.

Nikki McCall was instrumental in getting Cabin Creek Timber Frames involved in the project. The new sign is of Cypress. Cabin

Creek Timber Frames first commercial home was in the Jones Creek Community of Upper Cartoogechaye Creek, Franklin, NC
